

Employee Attrition Analytics Dashboard (Excel)

Project Overview

The **Employee Attrition Analytics Dashboard** is an interactive Excel-based HR analytics solution designed to help organizations monitor workforce trends, analyze employee attrition patterns, and support data-driven HR decision-making.

The dashboard provides insights into employee demographics, department-wise attrition, job role attrition, salary distribution, and gender-based workforce analysis through dynamic charts, KPIs, and slicers.

Objectives

- Analyze employee attrition trends.
 - Identify departments and job roles with high turnover.
 - Understand attrition patterns across age groups and gender.
 - Provide HR teams with actionable insights for employee retention strategies.
-

Dashboard Features

Key Performance Indicators (KPIs)

- **Total Employees:** 1480
- **Average Salary:** 6505
- **Average Age:** 37

Interactive Filters (Slicers)

Users can dynamically filter dashboard data by:

- Department
- Age Group
- Gender

Visualizations Included

1. Attrition Count by Age Group

Displays employee attrition across age categories:

- 18–25
- 26–35
- 36–45
- 46–55
- 55+

2. Attrition Count by Job Role

Highlights attrition trends among various job roles such as:

- Sales Executive
- Research Scientist
- Laboratory Technician
- Manufacturing Director
- Healthcare Representative
- Human Resources
- Others

3. Attrition Count by Department

Compares attrition across:

- Human Resources
- Research & Development
- Sales

4. Attrition Count by Gender

Shows gender distribution of attrition using a pie chart.

✂ Tools & Technologies Used

- **Microsoft Excel**
- Pivot Tables
- Pivot Charts
- Slicers
- Conditional Formatting

- Dashboard Design Techniques
 - Data Cleaning & Transformation
-

Dataset Information

The dataset contains HR-related employee information including:

- Employee ID
 - Age
 - Gender
 - Department
 - Job Role
 - Salary
 - Attrition Status
 - Other workforce attributes
-

Key Insights

- Research & Development department has the highest employee count and attrition contribution.
 - Employees in the **26–35** age group show the highest attrition.
 - Sales Executives and Research Scientists contribute significantly to overall attrition.
 - Gender distribution indicates a higher proportion of attrition among male employees.
-

How to Use

1. Download the Excel file.
 2. Open it using Microsoft Excel (2016 or later recommended).
 3. Use the slicers to filter data by:
 - Department
 - Age Group
 - Gender
 4. Explore the interactive charts and KPIs for insights.
-

Future Enhancements

- Attrition prediction using Machine Learning.
 - Employee satisfaction analysis.
 - Department-wise retention KPIs.
 - Automated data refresh using Power Query.
 - Migration to Power BI for advanced analytics.
